

WHAT IS CLAIMED IS:

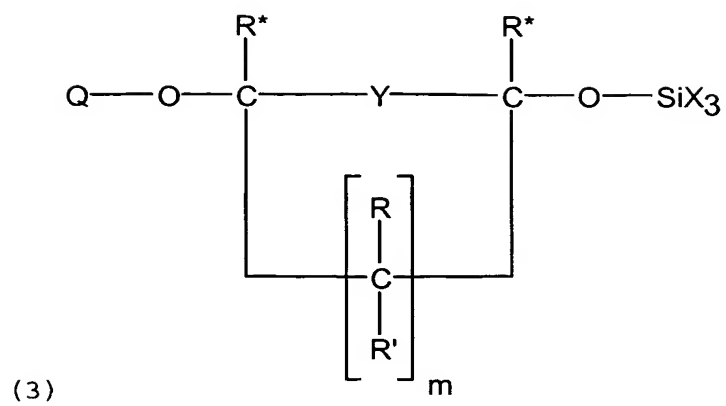

1. A modified silane compound having a structural formula selected from the group consisting of:

5

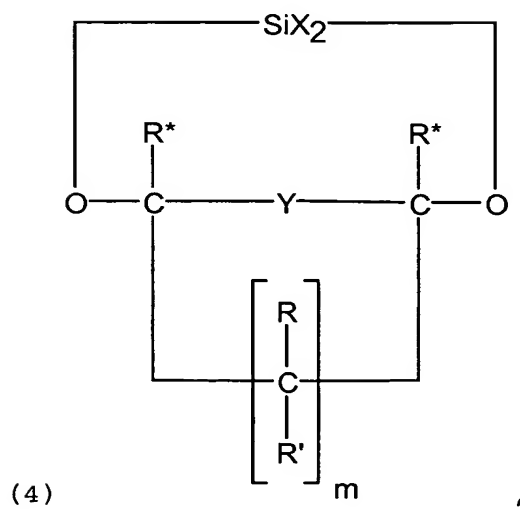

10

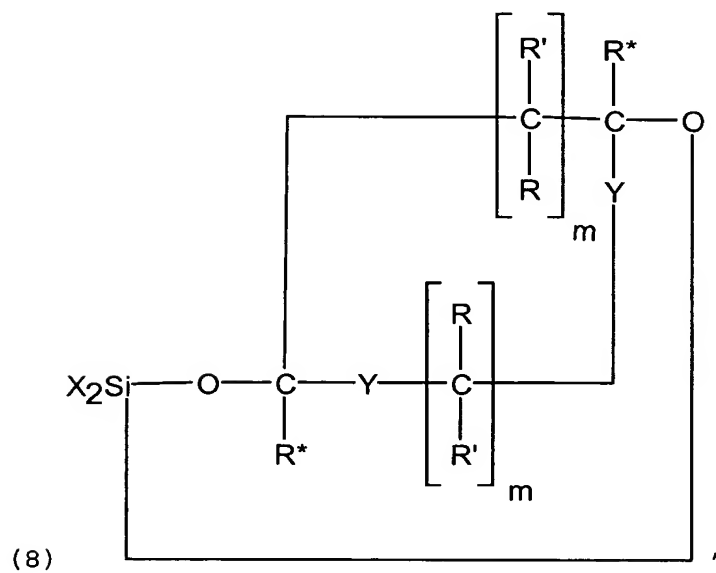

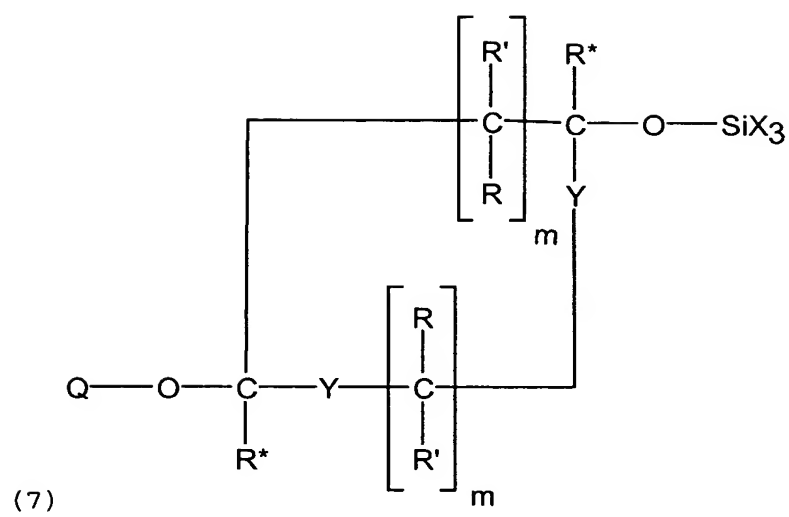

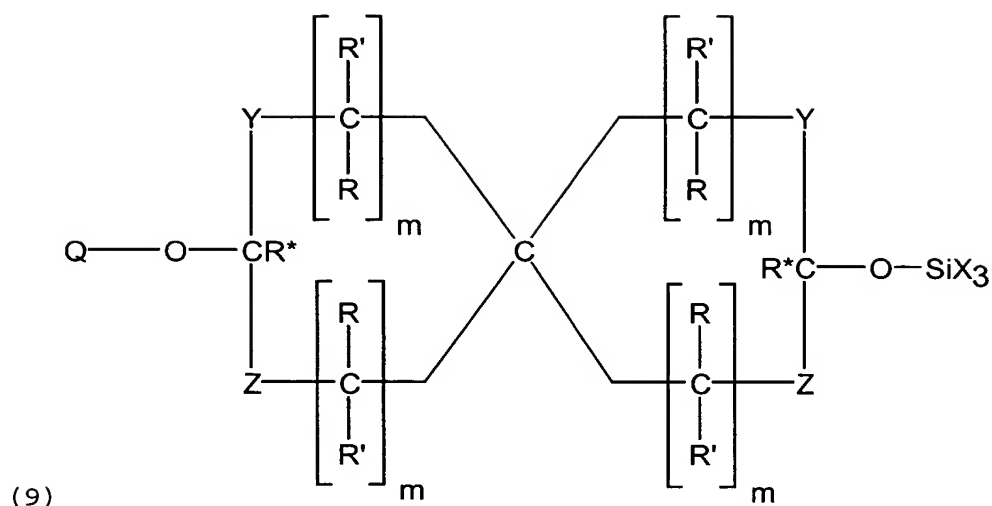

5

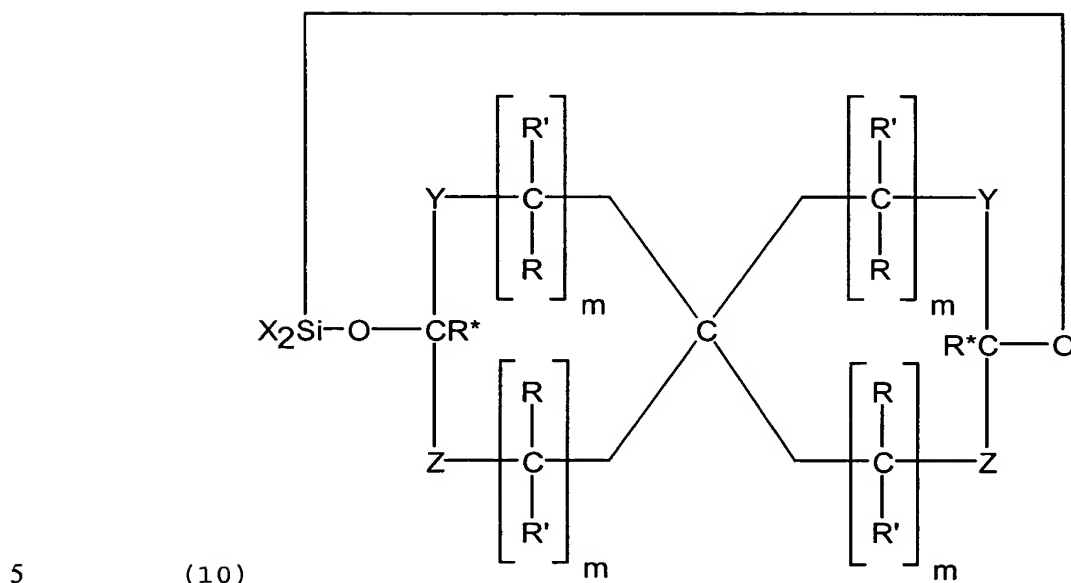

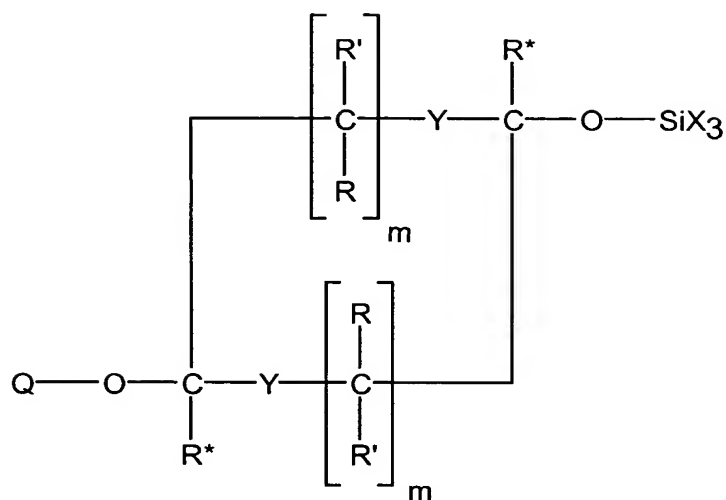

and

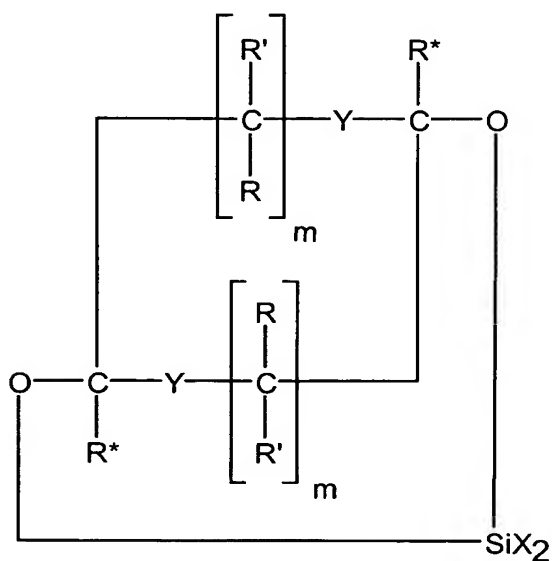

wherein m represents an integer from 1 to about 20; wherein
X groups can be the same or different; wherein X represents
a chemical moiety; wherein Q is selected from the group
consisting of hydrogen atoms and SiX₃; wherein R and R' can
be the same or different and are selected from the group
consisting of hydrogen atoms, alkyl groups containing from

1 to about 12 carbon atoms, aryl groups containing from about 6 to about 18 carbon atoms, alkaryl groups containing from 7 to about 18 carbon atoms, alkoxy groups containing from 1 to about 18 carbon atoms, hydroxy groups, and halide
5 atoms; wherein R* is selected from the group consisting of hydrogen atoms, alkyl groups containing from 1 to about 12 carbon atoms, aryl groups containing from about 6 to about 18 carbon atoms, and alkaryl groups containing from 7 to about 18 carbon atoms; wherein R, R', and R* can be bonded
10 together in any combination in cases where R, R', and R* are not hydrogen atoms, halide atoms, or hydroxy groups; wherein Y represents a moiety selected from the group consisting of oxygen, sulfur, nitrogen, and phosphorus; wherein Z represents a moiety selected from the group
15 consisting of C(R)R', oxygen, sulfur, nitrogen, and phosphorus; wherein the contiguous cyclic ring in formulas (1), (2), (3), (4), (5), (6), (7), (8), (9), and (10) can contain heteroatoms selected from the group consisting of oxygen, sulfur, nitrogen, phosphorus, and silicon in cases
20 where m represents an integer greater than 1; wherein the contiguous cyclic ring in formulas (1), (2), (3), (4), (5), (6), (7), (8), (9), and (10) can be saturated or unsaturated in cases where m represents an integer greater than 1; wherein said alkyl groups, aryl groups, alkaryl
25 groups, and alkoxy groups can contain halide atoms and heteroatoms selected from the group consisting of oxygen, sulfur, nitrogen, phosphorus, and silicon.

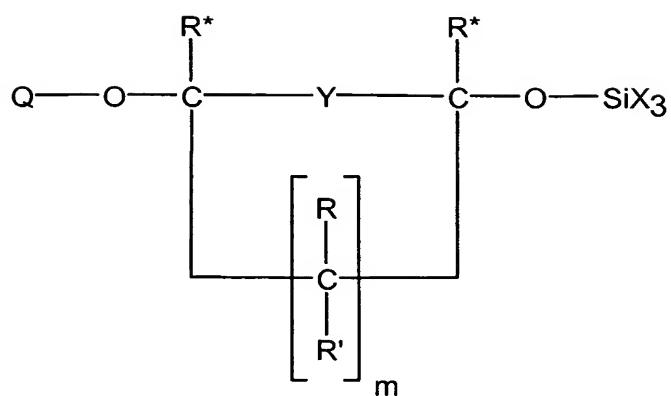

2. A modified silane compound as specified in claim
30 1 wherein the modified silane compound is of the structural formula:

3. A modified silane compound as specified in claim
1 wherein the modified silane compound is of the structural
5 formula:

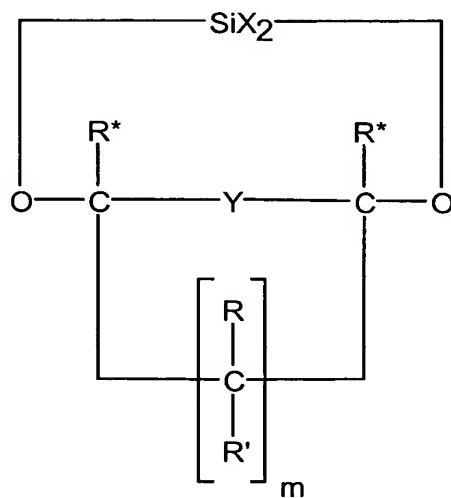

4. A modified silane compound as specified in claim
10 1 wherein the modified silane compound is of the structural
formula:

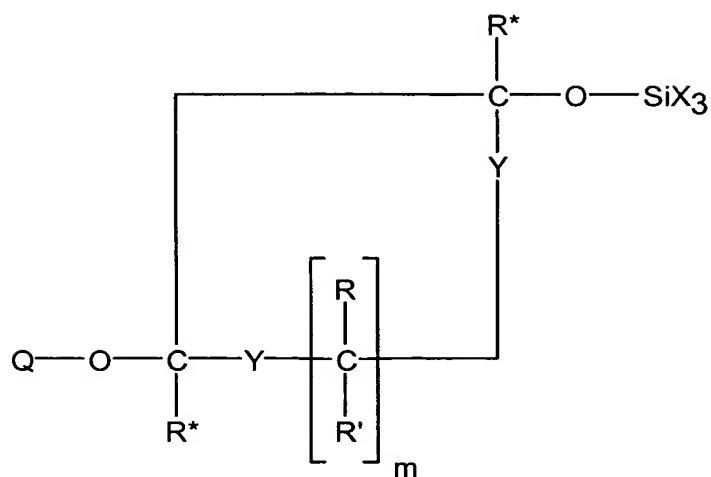

5. A modified silane compound as specified in claim 1 wherein the silane compound of the structural formula:

5

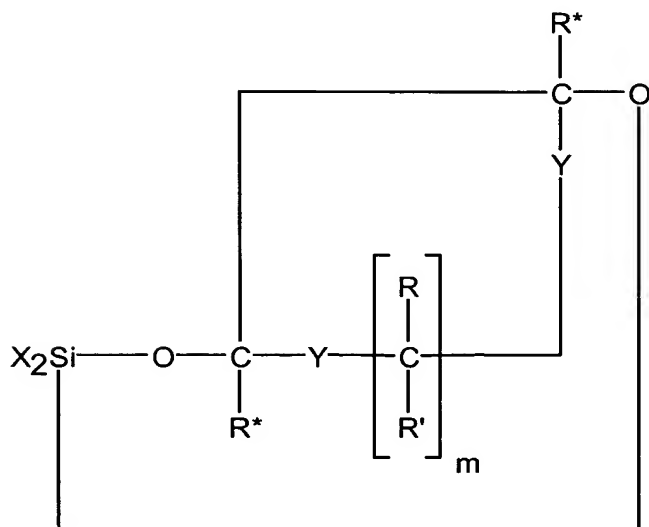

6. A modified silane compound as specified in claim 1 wherein the modified silane compound is of the structural formula:

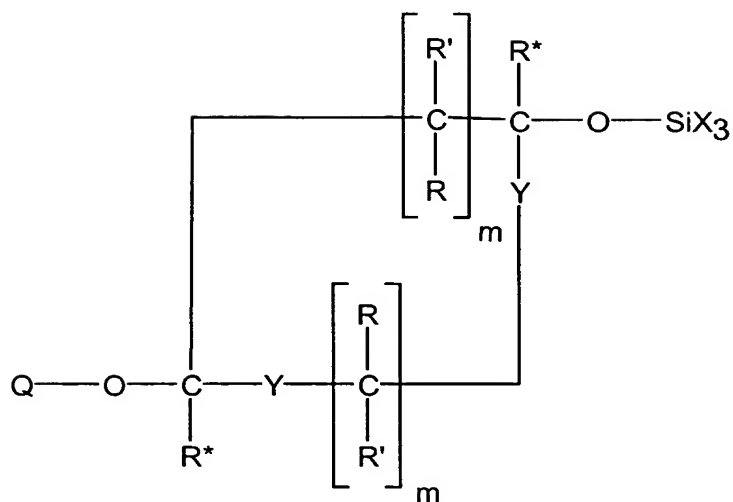

10

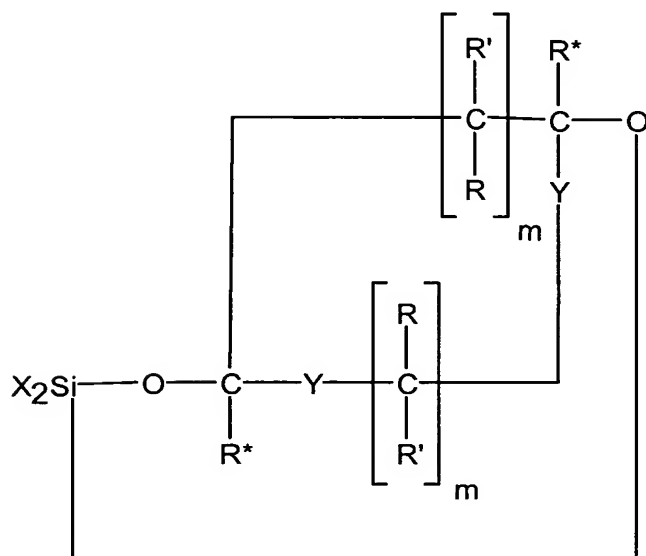

7. A modified silane compound as specified in claim
 1 wherein the modified silane compound is of the structural
 5 formula:

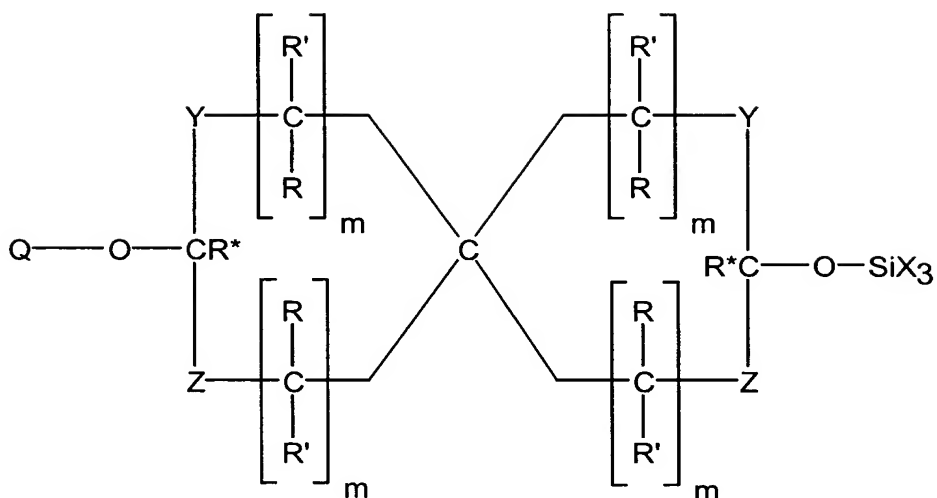

8. A modified silane compound as specified in claim
 10 1 wherein the modified silane compound is of the structural
 formula:

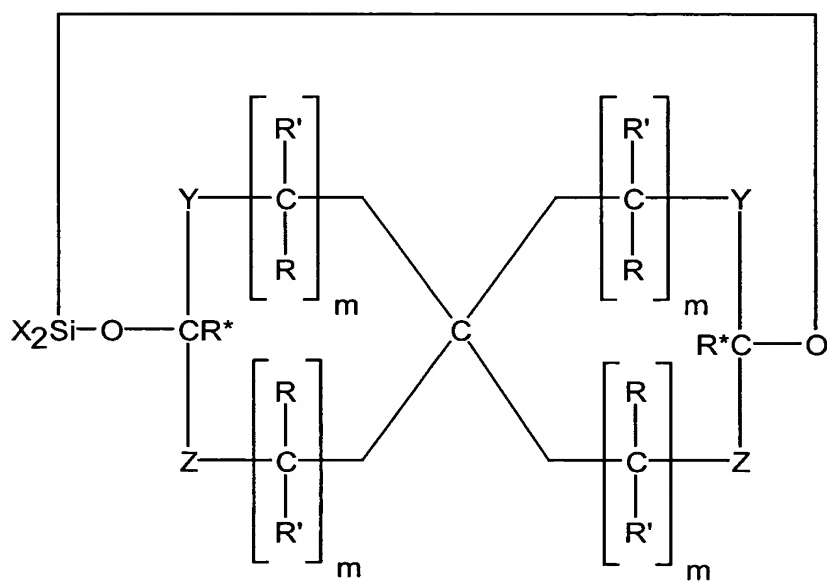

9. A modified silane compound as specified in claim
1 wherein the modified silane compound is of the structural
5 formula:

10. A modified silane compound as specified in claim
10 1 wherein the modified silane compound is of the structural
formula:

11. A modified silane compound as specified in claim
1 wherein the modified silane compound is of the structural
5 formula:

12. A modified silane compound as specified in claim
10 wherein at least one of the members selected from the
group consisting of R and R' is a hydroxyl group.

13. A modified silane compound as specified in claim 2 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.

5 14. A modified silane compound as specified in claim 3 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.

10 15. A modified silane compound as specified in claim 4 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.

15 16. A modified silane compound as specified in claim 5 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.

20 17. A modified silane compound as specified in claim 6 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.

18. A modified silane compound as specified in claim 7 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.

25 19. A modified silane compound as specified in claim 8 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.

30 20. A modified silane compound as specified in claim 9 wherein at least one of the members selected from the group consisting of R and R' is a hydroxyl group.
